E-mail	DKIM, SPF, IPv6, DNSSEC
Print/scan/ document	PDF/A, ODF, IPv6, PNG, JPEG
Geo, soil, water	Geo-standards (Inspire), SIKB, Aquo standard
Messaging System2system	Digikoppeling(EBMS, WUS/WSRM)
Base registries	StUF, Geo-standards, (SUWI-ML), Digikoppeling
Information security	ISO 27001/2, DNSSEC, DKIM, SAML
Finance/ e-invoice	XBRL, SEPA, SETU, Semantic invoice model

ODF 1.2

KING is *the* trusted partner for municipalities on Quality

To monitor or not that's the question

Rules are strict but the devil is in the detail

Policy on standards, the devil is in the detail

The Forum mandate says: You, governmental institution, have to comply or explain to the standards on the list, when buying an IT system that is used cross domain as stipulated in the list.

Questions/ discussion

- What should we monitor?
 - Procurement or usage?
- Cross domain or anyhow? F.i. office formats, digi inkoop, digidoc
- Can ODS help Open Data policy?
